Cashier Agent | Eko Electricity Distribution Company (EKEDC), Ikoyi Lagos

February 2019 – Present

Customer Service & Operations

- Process daily electricity token generation for residential and commercial customers
- Handle customer inquiries, billing issues, and payment processing efficiently
- Manage cash transactions, reconciliation, and end-of-day reporting with high accuracy
- Provide technical support to customers regarding meter installations and usage
- Maintain detailed transaction records and ensure compliance with company procedures

Key Skills Developed

- **Customer Relationship Management** - Handled diverse customer needs with professionalism and patience
- **Attention to Detail** - Managed financial transactions with zero discrepancies
- **Problem Solving** - Resolved customer complaints and technical issues independently
- **Time Management** - Balanced high customer volume during peak hours efficiently
- **Systems Proficiency** - Operated EKEDC billing and token generation software daily

Impact

- Maintained excellent customer satisfaction through prompt and accurate service delivery
 - Successfully processed thousands of transactions with minimal errors
 - Built strong relationships with regular customers through consistent, reliable service
-

PROFESSIONAL SUMMARY

Freelance Full Stack Developer with **5+ years** of experience delivering high-quality web applications for international clients on **Upwork and through direct contracts**, while maintaining a stable role in customer service operations. Expert in **.NET (C#), React, TypeScript, and Node.js** with strong focus on **Clean Architecture, scalable system design, and modern development practices**. Combines technical expertise with excellent customer service skills and attention to detail.

Passionate about exploring **modern architectural patterns (Clean Architecture, CQRS)** and **emerging AI technologies**. Strong advocate for **clean code principles, automated testing, and DevOps practices**. Collaborative team player with experience delivering business-aligned solutions in **Agile environments**.

CORE COMPETENCIES

Architecture & Design Patterns

• Clean Architecture • CQRS • Domain-Driven Design (DDD) • Microservices • Repository Pattern • Event-Driven Architecture • RESTful & GraphQL APIs

Backend Development

• C# / .NET 8+ • ASP.NET Core • Entity Framework Core • Node.js • MediatR • FluentValidation • SignalR • PostgreSQL • SQL Server • Redis

Frontend Development

• React.js • Next.js 14+ • TypeScript • Tailwind CSS • GSAP • State Management (Redux, Zustand) • Server Components • React Query

DevOps & Cloud

• Docker • Docker Compose • Azure DevOps • CI/CD Pipelines • Git/GitHub Actions • Azure Cloud • Kubernetes (basics)

Development Practices

• Test-Driven Development (TDD) • Unit/Integration Testing (xUnit, Jest) • Code Reviews • Agile/Scrum • Technical Documentation

PROFESSIONAL EXPERIENCE

Senior Full Stack Software Engineer | Freelance (Upwork & Direct Clients)

February 2019 – Present

Architecture & System Design

- Designed and implemented full-stack applications using **Clean Architecture principles** and **modern design patterns**
- Built scalable web applications following **CQRS patterns** with clear separation of concerns
- Applied **Domain-Driven Design (DDD)** concepts in complex business applications for international clients
- Implemented **repository pattern** and **unit of work** for maintainable data access layers

Full Stack Development

- Developed **multiple production applications** using **React.js, Next.js 14, TypeScript, and .NET Core** for clients across different industries
- Built responsive, accessible user interfaces using **Tailwind CSS** and modern CSS practices
- Created reusable component libraries to accelerate development and ensure consistency
- Implemented **server-side rendering (SSR)** and **API routes** with Next.js for optimal performance

Client Projects & Deliverables

- Successfully delivered projects for clients in **e-commerce, fintech, SaaS, and service industries**
- Managed project timelines, client communications, and requirement gathering independently
- Provided post-launch support, bug fixes, and feature enhancements based on client feedback
- Maintained **95%+ client satisfaction rating** on Upwork with positive reviews

Backend Engineering

- Designed and implemented **RESTful APIs** using **ASP.NET Core** with JWT authentication and proper security measures
- Built data access layers using **Entity Framework Core** with optimized queries and database design
- Implemented **MediatR** and **FluentValidation** for clean, maintainable command/query handling
- Developed background job processing and scheduled tasks for various client requirements

DevOps & Quality Assurance

- Set up **CI/CD pipelines** and deployment processes for client projects
- Containerized applications using **Docker** and **Docker Compose** for consistent deployments
- Implemented testing strategies using **xUnit** and integration tests where appropriate
- Configured **logging and monitoring** solutions for production applications

Client Management & Communication

- Managed client relationships, gathering requirements and providing technical consultations
- Translated business needs into technical specifications and project timelines
- Provided regular project updates, demos, and documentation to clients
- Handled scope changes, feature requests, and troubleshooting efficiently
- Facilitated **technical workshops** on TypeScript, React patterns, and .NET best practices
- Collaborated with **product managers, designers, and stakeholders** to translate business requirements into technical solutions
- Actively participated in **Agile ceremonies** (sprint planning, daily standups, retrospectives, backlog grooming)

Key Achievements

- Successfully completed **15+ client projects** across multiple industries with positive reviews
- Maintained **high client satisfaction** with repeat business and referrals
- Delivered projects on time and within budget through effective project management
- Built long-term client relationships leading to ongoing development contracts

Graphics Designer | Island Computer College

July 2017 – December 2019

TECHNICAL PROJECTS

AI-Powered Customer Support Platform (*Personal/Learning Project*)

Tech Stack: .NET 8, OpenAI GPT-4, LangChain, React, PostgreSQL

- Building intelligent chatbot using **RAG (Retrieval-Augmented Generation)** pattern
- Implementing **conversation history** and **context-aware responses**
- Exploring integration with ticketing systems for automated routing
- **Goal:** Demonstrate practical AI integration skills and modern architecture

E-Commerce Platform for Fashion Retailer (*Freelance Client Project*)

Tech Stack: .NET 8, Next.js 14, PostgreSQL, Stripe, Docker

- Built full-stack e-commerce platform with product catalog, shopping cart, and payment integration
- Implemented **Clean Architecture** with clear separation between business logic and infrastructure
- Integrated **Stripe payment gateway** with secure checkout flow and order management
- Deployed on **Azure** with CI/CD pipeline for automated deployments
- **Result:** Successfully launched platform serving customers with seamless shopping experience

Real-Time Analytics Dashboard (*Freelance Client Project*)

Tech Stack: React, TypeScript, SignalR, .NET Core, Chart.js

- Developed real-time dashboard for business operations monitoring
- Implemented **WebSocket communication** using SignalR for live data updates
- Built responsive, interactive charts with smooth animations
- **Result:** Enabled client to monitor key metrics in real-time, improving decision-making

EDUCATION

Bachelor of Science in Accountancy

University of Lagos |

CERTIFICATIONS & CONTINUOUS LEARNING

Professional Certifications

- Meta Full Stack Developer Specialization (Coursera) – 2024
- Google Cloud Fundamentals: Core Infrastructure (Coursera) – 2024
- Secure Full Stack MEAN Developer – 2024
- Google Digital Skills for Africa - Digital Marketing Fundamentals – 2019

Ongoing Learning (*Add this to show you're current*)

- Advanced .NET Microservices Architecture

- Azure AI Services and Machine Learning
 - System Design and Scalability Patterns
 - Kubernetes and Container Orchestration
-

KEY ACHIEVEMENTS & METRICS

- ✓ Built production applications using modern architectural patterns and best practices
 - ✓ Managed end-to-end project delivery from requirements gathering to deployment
 - ✓ Established repeat client relationships through quality work and professional communication
 - ✓ Implemented CI/CD practices and modern development workflows for client projects
 - ✓ Actively learning AI integration, building proof-of-concept projects with OpenAI and LangChain
 - ✓ Maintained code quality standards through testing, documentation, and best practices
-

SOFT SKILLS

Leadership & Communication

Technical Leadership • Mentorship • Cross-functional Collaboration • Stakeholder Management • Technical Presentations

Problem Solving & Delivery

Analytical Thinking • System Design • Performance Optimization • Debugging • Time Management • Agile Methodologies

Innovation & Growth

Continuous Learning • Design Thinking • Process Improvement • Knowledge Sharing

LANGUAGES

- English (Fluent - Native)
