PROFESSIONAL SUMMARY

Full Stack Software Engineer with 5+ years of experience building and deploying production-ready web applications for international clients. Strong background in .NET (C#), ASP.NET Core, React, and PostgreSQL with focus on scalable API design, secure authentication, and clean system architecture. Experienced in delivering end-to-end solutions independently from requirements gathering to deployment.

TECHNICAL SKILLS

Backend: C#, .NET 8+, ASP.NET Core, Entity Framework Core, MediatR, FluentValidation, SignalR, JWT Authentication

Frontend: React.js, Next.js, TypeScript, Tailwind CSS, Redux, Zustand

Database: PostgreSQL, SQL Server

DevOps & Cloud: Docker, Docker Compose, CI/CD, GitHub Actions, Azure

Architecture: RESTful APIs, Clean Architecture, CQRS, Repository Pattern, Unit Testing (xUnit), Agile

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer (Freelance – Upwork & Direct Clients)

February 2019 – Present

- Designed and implemented secure RESTful APIs using ASP.NET Core with JWT authentication and role-based authorization.
- Built transaction-based systems ensuring data integrity using EF Core and database transactions.
- Applied CQRS patterns for separation of read and write operations.
- Developed responsive web applications using React, Next.js, and TypeScript.
- Containerized applications using Docker and configured CI/CD pipelines for automated deployment.

SELECTED PROJECTS

Real-Time Analytics Dashboard Developed real-time dashboard using SignalR for live updates and optimized backend queries for performance.

AI-Powered Customer Support Platform (Personal Project)

Built chatbot system integrating OpenAI API with structured backend architecture and conversation handling.

EDUCATION

Bachelor of Science in Accounting – University of Lagos

CERTIFICATIONS

Meta Full Stack Developer Specialization – 2024

Google Cloud Fundamentals – 2024

Secure Full Stack MEAN Developer – 2024
